Healthcare Operations & Project Management

Operations & Compliance | Implementation & Go-Live | Credentialing & Payer Enrollment | KPI Reporting & Analytics
Dallas-Fort Worth, TX | 501-817-6362 | lashondag01@gmail.com | linkedin.com/in/lashondag | lashondag01.github.io/portfolio

PROFESSIONAL SUMMARY

Healthcare operations and project management professional with 13+ years across behavioral health and enterprise IT, backed by an M.S. in Business Analytics. Leads system implementations, compliance and audit remediation, provider credentialing and payer enrollment, and executive KPI reporting, and builds the SOPs and workflows that keep operations running. Recent results include an on-time EMR/LMS go-live, an organization's first executive KPI reporting, and a 75% reduction in open audit findings. Partners with CEOs, clinical directors, billing specialists, IT, and compliance officers to deliver projects on schedule and make results repeatable.

SELECTED ACCOMPLISHMENTS

- **Implementation to go-live:** Led a six-month Kipu EMR and Relias LMS implementation from business need through stabilization: defined configuration requirements, cleaned and validated legacy data, ran 15–20 UAT scenarios, and trained 20 staff for an on-time go-live with Clinical Director sign-off.
- **Provider enrollment for a new practice:** Led payer enrollment with Arkansas Medicaid, Arkansas BCBS, Ambetter, UnitedHealthcare, and Lucet, plus provider credentialing and Medicaid affiliation, to establish revenue-cycle readiness before launch.
- **First executive reporting function:** Built 5 KPI dashboards from scratch tracking admissions, utilization, payer mix, and revenue, giving leadership and the board on-demand performance visibility for the first time.
- **Repeatable process and controls:** Reduced open audit findings about 75% (80+ to ~20) in 6 months by leading root-cause analysis, SOP redesign, and corrective-action governance with the clinical director and outsourced compliance officer.

CORE SKILLS

Implementation & Project Management: End-to-end implementation and go-live, project plans and tracking, handoffs, status reporting to leadership, risk and issue management, UAT, QA of deliverables, vendor management, Agile/Scrum, Waterfall
Provider & Payer Operations: Provider credentialing and recredentialing (CAQH, NPPES, PECOS, Availity), Medicaid and commercial payer enrollment, Medicaid/MCO affiliation, payer contract amendments, insurance verification and authorization, claims submission and revenue monitoring
Process & Compliance: SOP, process flow, and template development, root-cause analysis, corrective-action tracking, HIPAA, 42 CFR Part 2, Joint Commission standards, CARF accreditation planning, audit preparedness, SOX controls
Metrics & Reporting: KPI dashboard design, launch and performance metrics, executive and board reporting, financial and break-even modeling, variance and trend analysis, data validation
Data, Systems & Tools: Microsoft Project, Salesforce CRM, Oracle CRM, Kipu EMR, Relias LMS, Microsoft 365, Advanced Excel, Power BI (Power Query), SQL Server, Google Sheets, Google Apps Script, Workfront, Trello; ChatGPT and Claude with human review of all output

PROFESSIONAL EXPERIENCE

Business Operations & Compliance Manager | Freshly Renewed Transitional **01/2024–07/2026**
Outpatient substance use treatment provider (OP, IOP, PHP) | Single site, ~25 employees

- Led the Kipu EMR and Relias LMS implementation (08/2024–02/2025) end to end: defined configuration requirements, cleaned and validated the legacy data export for import, ran 15–20 cross-functional UAT scenarios, trained 20 current and new-hire staff, and delivered an on-time go-live with Clinical Director sign-off and post-launch stabilization.
- Planned workflows, implementation documentation, and staff training to launch a new 6–8 bed residential treatment program (opened 05/2026), amended the Ambetter contract to add the new location, and prepared revenue expectations to guide leadership's launch planning.
- Managed provider recredentialing, payer enrollment with UnitedHealthcare, Lucet, and other commercial and Medicaid payers (CAQH, NPPES, PECOS, Availity), and Medicaid affiliations across clinical and administrative teams to maintain revenue-cycle readiness.
- Monitored claims submission and revenue in partnership with the contracted billing specialist.
- Built the organization's first centralized reporting: 5 KPI dashboards in Excel, Power BI, and Google Sheets tracking admissions, enrollment status, discharge reasons, utilization, and payer mix, with executive- and board-level reports available on demand.
- Reduced open audit findings about 75% (80+ to ~20) over 6 months: owned site compliance against Joint Commission and Arkansas licensure standards, led root-cause analysis of state licensing, accreditation, and Medicaid/payer findings with the clinical director and outsourced compliance officer, and redesigned SOPs and corrective-action workflows.

- Supervised 4–5 administrative staff across credentialing, payer enrollment, insurance verification and authorization, intake, and payroll coordination; owned the full new-hire process as HR generalist (~10 hires).
- Replaced manual, as-needed tracking with automated Google Apps Script workflows for weekly client coverage-date alerts, weekly client testing, and monthly staff PTO updates, saving about 3–5 staff hours per week across the team.
- Led vendor evaluation and company-wide migration of ~20 users from Bluehost to Microsoft 365, presenting findings and a recommendation to the CEO for final decision.

Business Operations & Systems Consultant | Inspire Therapeutic Services, LLC **12/2022–Present**

Outpatient behavioral health and substance use treatment practice, Arkansas | Contract, as needed

- Led payer enrollment with Arkansas Medicaid, Arkansas BCBS, Ambetter, UnitedHealthcare, and Lucet, plus provider credentialing (CAQH, NPPES, PECOS, Availity) and Medicaid affiliation, to establish revenue-cycle readiness for the new practice.
- Monitor claims submission and revenue in partnership with the contracted billing specialist.
- Mapped and standardized clinical intake workflows and administrative controls, and designed Google Sheets dashboards tracking census, session volume, referrals, payer mix, capacity, and revenue.
- Established the governance framework the founding team uses to track priorities and decisions: 12-month CARF accreditation roadmap, Business Plan, Strategic Plan (2026–2029), and Planning Charter.
- Built a financial feasibility model from Arkansas Medicaid and in-network carrier reimbursement rates to set break-even session volume, informing budgeting, staffing, and location planning.
- Authored Arkansas-specific policies and procedures covering OADAP licensure, BHA certification, 42 CFR Part 2, HIPAA, and Medicaid/MCO enrollment, plus client-facing privacy forms and emergency and safety protocols.

Campaign Specialist | Vestcom, an Avery Dennison Company **01/2021–05/2023**

Client implementation and project delivery for a shelf-edge media and marketing services provider to retailers and CPG brands

- Achieved ~95% on-time store activation across 5–6 concurrent retail campaigns, each deployed to every store in a national grocery retailer's regional division (one-day events to 5–6 week holiday programs), coordinating Sales, Corporate IT, Programming, Production, and Creative Operations in a matrixed delivery model.
- Owned pre-deployment quality control for creative assets, auditing artwork with external brand representatives for brand compliance and with IT for coding defects. Caught issues in ~5% of assets before they reached stores.
- Diagnosed root causes of late or incorrect activations (backend IT defects vs. store-level processing delays) and partnered with IT and internal stakeholders on fixes.
- Tracked timelines, dependencies, and risks in Trello using Agile-informed practices and reported status across teams; worked in Oracle CRM and Salesforce CRM.

IT Analyst | Vestcom, an Avery Dennison Company **06/2012–01/2021**

Production issue resolution, business systems analysis, and UAT

- Served as business systems liaison among corporate stakeholders, operations, developers, and technical support, authoring business requirements, functional documentation, test plans, user stories, and process maps for an average of 6–7 production releases per year.
- Led user acceptance testing and release validation, partnered on regression testing, and maintained traceability to business requirements documents (BRDs) so releases matched documented scope before sign-off.
- Supported SOX-controlled processes by maintaining documentation, validating system controls, and confirming required testing and approvals.
- Resolved client-reported production issues (pricing errors, tags not received, artwork problems) through SQL Server analysis and code research, routing confirmed defects to Programming and Creative and identifying client-supplied data causes.

EDUCATION

Master of Science, Applied Digital Technology – Business Analytics | Arkansas State University | 2025

Bachelor of Business Administration, Management Information Systems | University of Arkansas at Little Rock | 2012
